

MBS

MEMAAR BUILDING SYSTEMS

A Subsidiary of Emaar Industries & Investments

Manufacturer Of Pre-Engineered
Steel Buildings & Sandwich Panels

Version 2017.8

ABOUT US

Founded in 1997, Memaar Building Systems (MBS) is a subsidiary of Emaar Industries and Investments (EII), and is one of the largest manufacturers of Pre-Engineered Steel Buildings (PEB) and sandwich panels in the world. MBS is specialized in the design, manufacture and supply of Pre-Engineered Steel Buildings (PEB), using internationally recognized engineering software and the most advanced production machineries in the PEB industry.

Our current monthly production capacity is **8,000MT of steel buildings** and **150,000m² of sandwich panels** (consisting of PUR and PIR as core insulation) which allows us to handle large fast track jobs in the shortest time period.

Since establishment, MBS has supplied more than **35,000 buildings** to over **70 countries worldwide**.

Our Pre-Engineered Steel Building (PEB) System is unmatched in its quality, quick delivery and value. Buildings to suit specific needs are designed, engineered, manufactured and shipped in **less than 8 weeks** and at a price that is up to **30% lower** than the price of conventional steel buildings.

Clear span, up to **90m wide** (without intermediate columns), and eave height up to **30m high** are achievable. This functional versatility makes Pre-Engineered Steel Buildings (PEB) suitable and attractive for industrial, commercial, recreational, institutional, educational, aviation and agricultural applications; such as factories, workshops, warehouses, sports halls, aircraft hangars, bulk storages, cold stores, poultry buildings and many more.

For your inquiries, please provide your full address to enable us to send you our product brochures and company manual or you can alternatively visit our website at www.mbs.ae and view/download our marketing literature, manuals and photo gallery which includes pictures of some of our projects.

Pre-Engineered Steel Buildings (PEB) are the preferred choice for projects due to their:

- Initial low investment and cost efficiency
- Quick delivery and fast occupancy
- Architectural versatility
- Large span optionality
- Future expansion ability
- Low maintenance requirements
- Quick turnkey construction
- Sustainability, energy efficiency and recyclability
