Standard Panel Color Chart

Manufacturer Of Pre-Engineered
Steel Buildings & Sandwich Panels

Version 2.1021

Single Skin Panels:

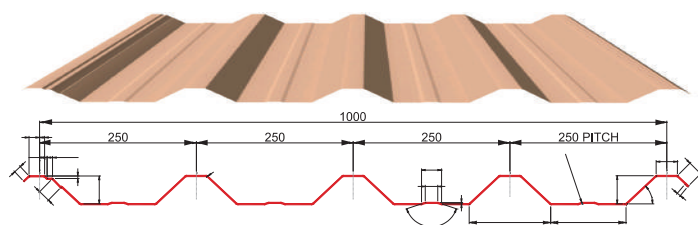

MBS has 2 major profiles for single skin panels:

- M 45-250
- M 45-150

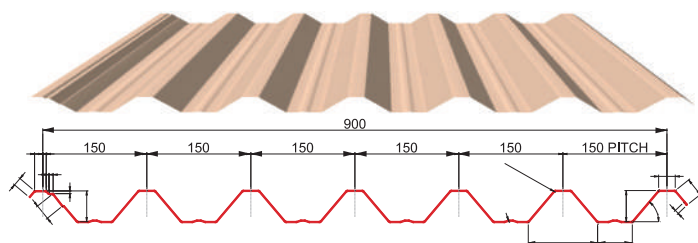

These profiles are available in both steel and aluminum. In addition to the above "Major Profiles", MBS offers various "Flat Panel" profiles, typically used as exterior and interior skins of sandwich panels or as liner panels:

- Microwave (MW)
- Microribbed (MR)
- Stripped (ST)
- Flat (FL)

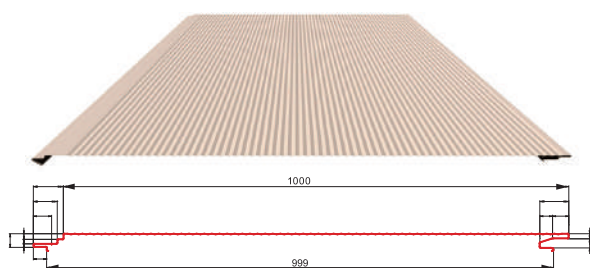

The standard MBS roof and wall panel profiles have been selected on the basis of optimizing value without sacrificing function.

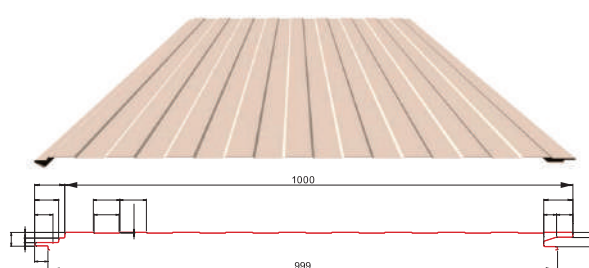

M 45-250

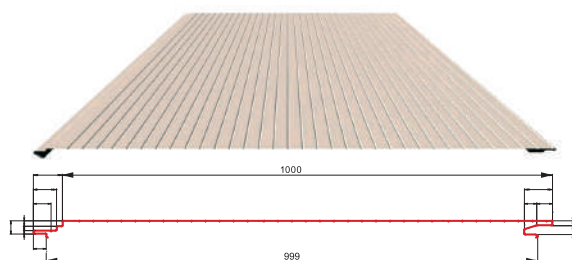

M 45-150

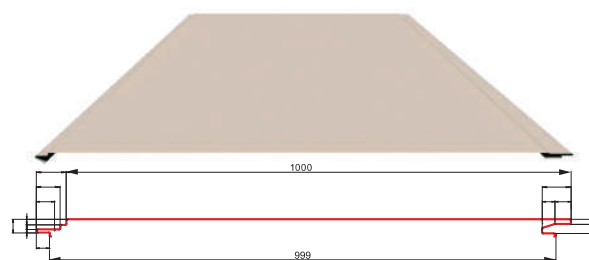

Microwave (MW)

Micro Ribbed (MR)

Stripped (ST)

Flat (FL)

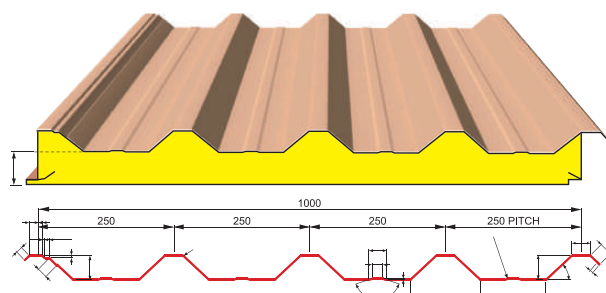

All the above profiles are readily supplied in MBS standard colors as listed below or any other RAL color upon request (subject to additional cost and time requirements):

- RAL 1001
- RAL 5012
- RAL 6021
- RAL 9002
- RAL 9016
- Aluzinc (Anti Fingerprint)
- Aluminium Mill Finish

Insulated Sandwich Panels:

MBS sandwich panels are manufactured using one of the most advanced panel lines in the world, and one of its kind in the region. MBS's current monthly capacity is 150,000m² of sandwich panels, keeping us ahead in the market.

MBS offers sandwich panels in various types and thicknesses consisting of PUR and PIR as a core insulation.

Sandwich Panel Cross Section

Available thicknesses: 35mm, 50mm, 75mm, 100mm, 125mm and 150mm
